

About Parker TAIYO

Company Profile

Integrated and Accelerated Fluid Technology

Helping to Develop Industrial Infrastructure and Promoting Vigorous Competition within the Industry

The business environment has changed drastically in the past several years due to the expansion of the borderless economy and technological innovation.

Diverse customers require new industrial infrastructure at lower costs.

Since our establishment in 1933, TAIYO has been helping to develop industrial infrastructures and promote vigorous competition within the industry.

We offer a wide variety of products, based on our abundant and unequalled quality and precision technology, ranging from hydraulic and pneumatic cylinders, industrial robots, conveyance systems and mechatronics equipment to completed production line systems.

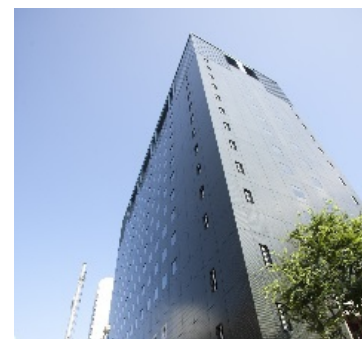

We enjoy a reputation for excellent customer service that includes tailoring our products to meet customer needs. With our unique technology and superior satisfying service, TAIYO is stepping into a new realm by providing not only various types of cylinders but also comprehensive system to promote the advancement of industrial infrastructure.

Wide Selection of Products that Best Meet Various Needs
