Results of Search in US Patent Collection db for:

AN/illumio AND AC/Sunnyvale: 17 patents.

Hits 1 through 17 out of 17

PAT. NO.	Title
1 10,693,718	Updating management instructions for bound services in a distributed network management system
2 10,608,945	Creating rules for labeled servers in a distributed network management system
3 10,476,745	Infrastructure-agnostic network-level visibility and policy enforcement for containers
4 10,326,650	Enforcing rules for bound services in a distributed network management system that uses a label-based policy model
5 10,320,617	Representation of servers in a distributed network information management system for efficient aggregation of information
6 10,277,460	Updating management instructions for bound services in a distributed network management system
7 10,212,191	Automated generation of access control rules for use in a distributed network management system that uses a label-based policy model
8 10,148,511	Managing servers based on pairing keys to implement an administrative domain-wide policy.
9 9,942,102	Handling changes in a distributed network management system that uses a logical multi-dimensional label-based policy model
10 9,923,928	Automated generation of access control rules for use in a distributed network management system that uses a label-based policy model
11 9,912,554	End-to-end policy enforcement in the presence of a traffic midpoint device
12 9,882,919	Distributed network security using a logical multi-dimensional label-based policy model
13 9,882,783	Distributed network management using a logical multi-dimensional label-based policy model
14 9,553,768	Determining, without using a network, whether a firewall will block a particular network packet
15 9,509,574	End-to-end policy enforcement in the presence of a traffic midpoint device
16 9,485,279	Automated generation of access control rules for use in a distributed network management system that uses a label-based policy model
17 9,397,892	Managing servers based on pairing keys to implement an administrative domain-wide policy.
