PAT. NO.	Title
1 9,490,724	Methods for controlling electrical inverters and electrical inverters and systems using the same
2 9,490,626	Methods for anti-islanding in distributed-source electrical power generation and distribution systems and electrical systems and apparatus using same
3 9,231,408	Matrix connection device for photovoltaic panels and/or wind turbines
4 9,188,970	Circuit assembly having a converter part comprising a central control unit
5 9,124,128	Arrangement for an uninterruptible power supply
6 8,976,544	Resonant circuit inverter with controllable operating point
7 8,917,508	Arrangement of a power semiconductor circuit
8 8,829,867	Device for the distribution of firing pulses circuit arrangement for the sequence control of power regulators
9 8,829,711	Modular power supply arrangement
10 8,817,840	Power supply arrangement
11 8,767,427	Arrangement for power supply for a reactor for production of polysilicon with a frequency converter
12 8,525,043	Printed substrate through which very strong currents can pass and corresponding production method
13 8,493,697	Arrangement for ground-fault detection in an AC circuit and power supply arrangement with ground-fault detection
14 8,441,146	Power supply arrangement with a first voltage supply device and a second voltage supply device
15 8,369,050	Circuit for protecting a DC network with DC loads against overvoltage
16 8,330,302	Device for the ignition and the start-up of silicon rods
17 8,330,300	Device and method for producing a uniform temperature distribution in an object during a precipitation process
