Leading through true innovation

A passion for technology, many years of experience and a strong innovative spirit have been incorporated into the manufacture of outstanding grinding solutions.

With **CERABOND X**, TYROLIT sets a milestone in the abrasives market. The combination of ceramic grain and the unique TYROLIT bond system enables consistent cutting ability of the discs, combined with unique durability.

TYROLIT Power revolutionised the finishing of hard surfaces. Sanding strips consisting of layers made from cactus hair and diamond provide extreme hardness, save time and significantly reduce vibrations for the user.

With the future-oriented new **P-technology**, our team of experts has developed a new, more sustainable method to create the artificial porosity in our vitrified grinding wheels. With the new P-Technology, the artificial pores are created without naphthalene and are therefore more environmentally friendly.

Our patented **lightweight core technologies** enable us to improve customers' precision grinding processes, saving them time and money. This is possible through computer-calculated targeted material reductions or the use of natural fibres.

With our modular assistance system **ToolScope** we set a milestone for the digitalisation of grinding technology. The system allows customers to utilise existing data and through increased process transparency optimise their whole production chain.

MoveSmart is a novel monitoring system for the construction industry, connecting TYROLIT machines to the Internet of Things and processing user data directly on site and in real-time. A smart move into the future.

International leader with deep regional roots since 1919.

Since 2022, TYROLIT is managed by an Executive Board of four members who share the values lived by the founding Swarovski family and carry their vision into the world. In its more than 100 years of history, the internationally leading and modern company has more than met the demands of the market time and again with its innovative spirit and know-how.

We strive to impress internal and external target groups and to cultivate fair, long-lasting cooperation based on partnership. To this end, we continually optimise the quality of our products and services, and constantly adapt our business processes to the changing demands of the market.

Our global supply chain management ensures on-time delivery of our products to customers around the world. Investments in research and development, in training our employees and in technological improvements are integral parts of our corporate culture.

The sustainable handling of resources, the guaranty of a safe working environment and compliance with legal requirements have contributed to the company's positive development since 1919.
